

HP V-M200 802.11n Access Point Series

Product overview

The HP V-M200 802.11n Access Point provides wireless connectivity for your expanding network. Take full advantage of the next-generation IEEE 802.11n standard with the V-M200 access point's dual-band capability while simultaneously supporting IEEE 802.11a or 802.11b/g devices. The new Web user interface makes the V-M200 access point easy to set up, yet retains key functionality to keep your sensitive data secure.

Key features

- IEEE 802.11a/b/g/n access point
- Single radio, dual band (2.4 GHz and 5 GHz)
- Independently managed
- Easy-to-use Web user interface
- Powered by 802.3af PoE or included power supply

Features and benefits

Management

- **NEW Secure and easy-to-use Web UI:**
 - **Quick setup page:** consolidates key settings into one page for simple and rapid configuration for common deployment scenarios
 - **HTTPS secured management sessions:** prevent management sessions from being observed on the network
- **Integration with HP PCM:** enables discovery and mapping via HP PCM, available as a free download from the Web; provides all the basic tools needed to handle a network effectively, along with a 60-day trial version of HP PCM+
- **IEEE 802.1AB Link Layer Discovery Protocol (LLDP):** automated device discovery protocol provides easy mapping by network management applications
- **Manager, operator privilege levels:** provides read-only (operator) and read-write (manager) access levels for Web management

Connectivity

- **NEW Fully IEEE 802.11n-compliant dual-band access point:**
 - **2.4 GHz frequency band support:** uses your IEEE 802.11n wireless clients alongside legacy IEEE 802.11b/g devices
 - **5 GHz frequency band support:** operates your IEEE 802.11n and 802.11a devices in the 5 GHz spectrum, which has less interference from microwave ovens, Bluetooth® devices, and cordless phones
- **IEEE 802.3af PoE-powered device (PD) option:** simplifies deployment and dramatically reduces installation costs by helping to eliminate the time and cost involved in supplying local power at each access point location
- **Auto-MDIX:** automatically adjusts for straight-through or crossover cables on the 10/100/1000 port
- **Spanning Tree Protocol (IEEE 802.1D):** prevents network loops

Mobility

- **Four wireless communities:** consolidates Quality of Service, security, and VLAN settings into one easy-to-manage identifier per SSID

- **Service-class segmentation:**
 - **Up to four SSIDs (one per wireless community):** allows administrator to identify multiple service sets for clients to access
 - **Up to four VLANs (one per wireless community):** IEEE 802.1Q VLAN tagging provides security between workgroups
 - **Wireless community-based prioritization:** allows the administrator to help ensure that key network traffic is prioritized by weighting specific wireless communities
- **Auto Channel Select (ACS):** helps reduce radio co-channel interference by automatically selecting an unoccupied radio channel
- **Wireless Distribution System (WDS) modes:**
 - **Access Point and WDS Bridge, Access Point Only, WDS Bridge Only, and Monitor:** allow HP V-M200 802.11n Access Points to connect wirelessly to other HP V-M200 802.11n Access Points without a wired backbone; this is useful for extending the network across areas where no wired infrastructure exists
- **Interoperability:** meets Wi-Fi Alliance certifications, including IEEE 802.11n Wi-Fi and WPA2 to help provide multivendor interoperability
- **Three external 3x3 MIMO omni-directional antennas:** enable the antennas to be configured for improved radio coverage and performance
- **Quality of Service management:**
 - **IEEE 802.1p:** maps WMM prioritization to IEEE 802.1p queues on the wired network
 - **Wireless community-based prioritization:** allows users to prioritize traffic based on wireless community (SSID)
 - **DiffServ:** prioritizes data based on the traffic class

Security

- **AP client access control functions:**
 - IEEE 802.1X authentication using EAP-SIM, EAP-FAST, EAP-TLS, EAP-TTLS, and PEAP
 - MAC address authentication using local or RADIUS access lists
 - RADIUS AAA using EAP-MD5, PAP, CHAP, and MS-CHAPv2
 - Layer 2 wireless client isolation
- **RADIUS-based MAC authentication:** authenticates a wireless client with a RADIUS server based on the MAC address of the client; this is useful for clients with minimal or no user interface
- **Choice of IEEE 802.11i, Wi-Fi Protected Access 2 (WPA2), or WPA:** locks out unauthorized wireless access by authenticating users prior to granting network access; robust Advanced Encryption Standard (AES) or Temporal Key Integrity Protocol (TKIP) encryption secures the data integrity of the wireless traffic
- **Secure Sockets Layer (SSL):** encrypts all HTTP traffic, allowing secure access to the browser-based management interface of the access point
- **Local wireless bridge client traffic filtering:** when enabled, prevents communication between wireless devices associated with the same access point
- **Closed system:** restricts broadcast of SSID as a security measure to conceal presence of the wireless network; access point does not respond to the wireless client probe request of "ANY"
- **Management password:** provides security so that only authorized access to the Web browser interface is allowed
- **Wired Equivalent Privacy (WEP) using 40 or 120 static or dynamic keys:** provides backward compatibility for legacy clients
- **Rogue AP detection:** identifies all access points in range; known or trusted access points can be saved, allowing network administrators to identify unauthorized access points

Monitor and diagnostics

- **Diagnostic:**
 - Client event log records association, authentication, and DHCP events
 - Packet capture tool for Ethernet and IEEE 802.11 interfaces (PCAP format)
 - Data rate matrix
 - Remote SYSLOG

Warranty and support

- **Lifetime warranty:** for as long as you own the product with advance replacement and next-business-day delivery (available in most countries)*
- **Electronic and telephone support:** limited electronic and telephone support is available from HP; refer to www.hp.com/networking/warranty for details on the support provided and the period during which support is available
- **Software releases:** refer to www.hp.com/networking/warranty for details on the software releases provided and the period during which software releases are available for your product(s)

*Hardware warranty replacement for as long as you own the product, with next business day advance replacement (available in most countries) with a five-year hardware warranty replacement for the disk drive included with HP AllianceONE Services z1 Module, HP Threat Management Services z1 Module, HP PCM+ Agent with AllianceONE Services z1 Module, and HP E-MSM765 z1 Mobility Controller. For details, refer to the HP Software License, Warranty, and Support booklet at www.hp.com/networking/warranty.

HP V-M200 802.11n Access Point Series

Specifications

HP V-M200 802.11n Access Point (US) (J9467A)

HP V-M200 802.11n Access Point (WW) (J9468A)

Ports	1 RJ-45 auto-sensing 10/100/1000 port (IEEE 802.3 Type 10Base-T, IEEE 802.3u Type 100Base-TX, IEEE 802.3ab Type 1000Base-T); Media Type: Auto-MDIX; Duplex: 10Base-T/100Base-TX: half or full; 1000Base-T: full only	1 RJ-45 auto-sensing 10/100/1000 port (IEEE 802.3 Type 10Base-T, IEEE 802.3u Type 100Base-TX, IEEE 802.3ab Type 1000Base-T); Media Type: Auto-MDIX; Duplex: 10Base-T/100Base-TX: half or full; 1000Base-T: full only
